## EDUCATION

2013 - 2014 **MSc Information and Technology, University of Aberdeen**

The course is designed for individuals who are not coming from an IT background. Vast amount of materials are covered during the course enable us to become more familiar to programming and software design in just one year time.

2009 - 2013 **MA (Hons) Accounting and Finance, University of Aberdeen  
(Second Upper Honour obtained)**

The course mainly focused on Accounting and Finance. I also did Management, Economic Statistic and Business law as complements to the course.

## WORK EXPERIENCE

Jan 2013 **The Manchurian Chinese Restaurant, Aberdeen, Scotland**  
- Present

I am working as a part time waiter in this popular and busy Chinese restaurant. I have learnt to be a team player in order to work efficiently and provide the best service to our customers. I have acquired communication skills from different challenges I faced during working. It has also prepared me to work under pressure and balance myself between work study and life.

Summer 2011 **Café de Coral Group, Hong Kong**

I worked at this busy, award-winning fast food restaurant for the past summer. My position was bar tender. My role is to prepare variety of drinks for customers and also provide customer service. The working hours were flexible and I had to work as shift worker. We had to have excellent customer service skills as well as ability to work under pressure in order to deliver best quality meal in shortest time.

## **SKILLS**

**Team work and Communications** I have developed my team work skill through my university life as well as summer jobs. Being the treasurer of the Japanese society, I have improved my team work skill. When we organise events, we have to work as a team as it is more effective and efficient. The committee members and I have to meet up and discuss about it. I am responsible for managing the society's money. If any member of the society wants to use the money on behalf of the society, we will have to discuss about it and see if it is appropriate. In addition to that, we work as a team and we share ideas and suggestions. We then discuss the viability given the resources available to us. Then the president will assign jobs to each of us and we inform each other when we get the job done.

**IT** As I am doing MScIT, I am confident to say I possess knowledge about IT that is above average. I am familiar with Microsoft Office as I have used it frequently for my school works. Further more, I have learnt Object Oriented Languages such as PHP and Ruby on Rails. Last but not least, I love web design using HTML, CSS and JS.

**Organisation** I am a highly organised person, demonstrated through my position in the Japanese Society. As mentioned, I was responsible for the finance of the society. Hence if the account is unbalanced or if I have lost the receipts, I have to fix it using my own money. As a result, I have to be very organised in order to maintain the account. Further more, working in a busy restaurant helped develop these skills further to ensure I worked efficiently and competently under pressure.

## **INTERESTS**

**Travel** I enjoy travelling as I learn something new every time. I have been to a lot of places and the most remarkable country for me thus far are Russia and India. I love to explore and experience other cultures. For example, I have been to Delhi to attend a Punjabi Wedding and it was such a magnificent and amazing experience. I treasure every chance by attentively planning out my trip with my friends.

**Sports** Football is one of my favourite sports, I often play football with my friends and my position is striker. As a striker, I often have to collaborate with midfielders. This developed the teamwork and communication skills among our teammates.
