## Profile

I am a 25 years old Chinese male. I have a passion for web and mobile app development, currently working at [Grayscale](#) as a front-end developer.

## Development skills

### RUBY ON RAILS (3.2+)

During the year of my master degree, I have developed my Ruby of Rails skills through various group and individual projects. We have learnt about the object oriented programming and the MVC pattern.

Celtia is a chess-like online board game that we were working on as the summer project. Our objective was to renovate the front-end and to continue working on the game engine.

<http://celtiademo.herokuapp.com>

### PHP (WORDPRESS)

As a front-end developer, I work with WordPress on a daily basis. Therefore I am fairly familiar with writing templates in php as well.

### HTML5 AND CSS3

My main duty as a front-end developer is to work with the web designer and build the website based on the design. Therefore HTML and CSS is something that I write everyday.

### JAVASCRIPT

We often have a lot of dynamic content and interactions in the websites we do, we have to be able to work with many different Javascript libraries. Sometimes we have to write our own as well.

### MOBILE APP DEVELOPMENT

Currently working on a hybrid mobile app written in HTML/CSS/JS using ionic framework. I am at the same time doing a part time course on iOS Swift Mobile development at General Assembly. I am hoping to release my first app on Apple app store this year.

### WEBSITES I HAVE DONE

<http://onactivity.com> - onActivity is the leading expert on screen installations, digital signage and show projections in Hong Kong.

<http://www.sterlingapparel.com.hk> - For over twenty years, Sterling Apparel has committed to producing high-end, superbly designed apparel with our skilled know-how and unparalleled craftsmanship.

<http://theedge.com.hk> - The Edge is a Hong Kong and China based learning centre designed to help you achieve the best through proven methods, under the expert guidance of people who are qualified at the very highest level.
